PROJECTS

MIT Transportation Department's official app

Solo developer   *June 2023 - present*
- Developing the official app for **MIT ADT University's** transportation department using **Flutter** and **Firebase**, resulting in a more efficient management system for students utilising transportation services.

Scan and Solve

Flutter developer   *Jan 2023 - present*
- Developed a ChatGPT app in edu-tech utilising Flutter, Figma, Firebase and prompt engineering to enable image recognition and the extraction of text from images for answer pollination.

SONCUR App

Solo developer   *July 2022 - Feb 2023*
- Developed an app for a client which uses Machine Learning API which is then integrated with the frontend developed in a flutter.
- Developed full-stack app using Flutter frontend, Firebase Backend and API based in Microsoft Azure

WORK EXPERIENCE

Intern at Mitt Arv   **Singapore(Remote)**

Mobile App developer   *Jan 2023 - June 2023*
- Developed and launched a user-friendly SaaS platform to help individuals manage their assets and wealth after death.
- Worked with a **big global team** of 15-20 developers and overall **+40 colleagues** to manage and develop the app.

Android developer at Younoia   **Pune**

Core team member   *Jan 2022 - March 2022*
- Worked with a team of ~15 interns to create an app that tracks mood and helps people aged 18 to 24 cope with rising mental health problems.
- **Developed** the app and **recruited** and **managed** ~15 interns working under the startup.

Tech lead at ERC   **Pune**

Flutter Developer   *July 2022 - present*
- Leading the development of a campus app that allows college students to stay updated on all campus events and club activities **for MIT ADT University**.
- Worked with 5 developers to design, build, and test the app.

Intern at Feesbook   **Delhi(Remote)**

Flutter App developer   *September 2022 - November 2022*
- Increased efficiency in managing tuition class fees by developing an app that allowed for easy tracking and calculation of fee payments
- Developing the app using Flutter and Firebase, which provided a smooth and user-friendly interface
